Revised state personal income estimates for 2005-2007 were released September 18, 2008. These estimates incorporate newly available state-level source data. Per capita personal income and per capita disposable personal income were computed using midyear population estimates of the Census Bureau, released December 2007.

<sup>1</sup>Per capita personal income is total personal income divided by total midyear population.

<sup>2</sup>Per capita disposable personal income is total disposable personal income divided by total midyear population estimates of the Bureau of the Census.
