

Selected Social Characteristics in the United States: 2006-2008  
 Data Set: 2006-2008 American Community Survey 3-Year Estimates  
 Survey: American Community Survey  
 Geographic Area: Clinton, IA--IL Urban Cluste

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Selected Social	Estimate	Margin of Error (+/-)	Percent	Margin of Error (+/-)
<b>HOUSEHOLDS BY TYPE</b>				
<b>Total households</b>	<b>13,833</b>	<b>477</b>	<b>13,833</b>	<b>(X)</b>
Family households (families)	7,920	497	57.3%	3.6
With own children under 18 years	3,521	416	25.5%	2.8

Source: U.S. Census Bureau, 2006-2008 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

-Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

-The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Because of contextual differences between the 2008 disability data and disability data collected in the previous two years, the Census Bureau is unable to combine the 3 years of disability data in order to produce the multi-year estimate that would appear in this table. Multi-year estimates of disability status will become available once three consecutive years of data are collected. For more information about the differences between the 2008 and prior year's disability questions, and the evaluation of these questions in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

-Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

-While the 2008 American Community Survey (ACS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2008 Puerto Rico Community Survey (PRCS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the
