

ACS Demographic and Housing Estimates: 2007
 Data Set: 2007 American Community Survey 1-Year Estimates
 Survey: 2007 American Community Survey 1-Year Estimate:
Geographic Area: Cedar Rapids city, Iowa

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

ACS Demographic and Housing Estimates: 2007	Estimate	Margin of Error	Percent	Margin of Error
SEX AND AGE				
Total population	128,324	+/-4,129	100%	(X)
Male	61,489	+/-2,409	47.9%	+/-1.1
Female	66,835	+/-2,548	52.1%	+/-1.1
Under 5 years	9,391	+/-953	7.3%	+/-0.7
5 to 9 years	9,841	+/-1,189	7.7%	+/-0.8
10 to 14 years	7,795	+/-1,418	6.1%	+/-1.1
15 to 19 years	7,975	+/-982	6.2%	+/-0.7
20 to 24 years	7,654	+/-1,024	6.0%	+/-0.7
25 to 34 years	20,566	+/-1,308	16.0%	+/-1.0
35 to 44 years	18,794	+/-1,811	14.6%	+/-1.3
45 to 54 years	17,738	+/-1,444	13.8%	+/-1.0
55 to 59 years	7,082	+/-1,050	5.5%	+/-0.8
60 to 64 years	4,996	+/-879	3.9%	+/-0.7
65 to 74 years	7,862	+/-765	6.1%	+/-0.6
75 to 84 years	6,517	+/-829	5.1%	+/-0.7
85 years and over	2,113	+/-531	1.6%	+/-0.4
Median age (years)	35.4	+/-0.9	(X)	(X)
18 years and over	96,458	+/-2,689	75.2%	+/-1.1
21 years and over	91,146	+/-2,770	71.0%	+/-1.2
62 years and over	19,228	+/-1,534	15.0%	+/-1.3
65 years and over	16,492	+/-1,122	12.9%	+/-0.9
18 years and over	96,458	+/-2,689	100%	(X)
Male	45,654	+/-1,643	35.6%	+/-1.0
Female	50,804	+/-1,680	39.6%	+/-0.9
65 years and over	16,492	+/-1,122	100%	(X)
Male	6,638	+/-626	5.2%	+/-0.5
Female	9,854	+/-674	7.7%	+/-0.6
RACE				
Total population	128,324	+/-4,129	100%	(X)
One race	125,322	+/-4,323	100%	(X)
Two or more races	3,002	+/-1,121	100%	(X)
One race	125,322	+/-4,323	97.7%	+/-0.9
White	115,819	+/-4,046	92.4%	+/-1.1
Black or African American	6,166	+/-1,134	4.9%	+/-0.9

Two or more races	2,468	+/-937	1.9%	+/-0.7
Two races including Some other race	0	+/-226	0.0%	+/-0.1
Two races excluding Some other race, and Three or more races	2,468	+/-937	1.9%	+/-0.7
Total housing units	59,773	+/-1,501	100%	(X)

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

-For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, Overview of Race and Hispanic Origin, issued March 2001. (pdf format)

-While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

·Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

·The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the ACS Subject Definitions for Disability.

·Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

·While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Unrelated individuals 15 years and over	26.1%	+/-4.2	(X)	(X)

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

- Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

- Workers include members of the Armed Forces and civilians who were at work last week.

- Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2000.

- Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002. However, the Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

- While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

- Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based

Selected Housing Characteristics: 2007
 Data Set: 2007 American Community Survey 1-Year Estimates
 Survey: 2007 American Community Survey 1-Year Estimate:
Geographic Area: Cedar Rapids city, Iowa

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties. For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Selected Housing Characteristics: 2007	Estimate	Margin of Error	Percent	Margin of Error

25.0 to 29.9 percent	1,933	+/-775	10.7%	+/-4.3
30.0 to 34.9 percent	1,527	+/-602	8.4%	+/-3.3
35.0 percent or more	5,741	+/-1,165	31.6%	+/-5.7
Not computed	821	+/-423	100%	(X)

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

·The median gross rent excludes no cash renters.

·While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

·Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates
