NOTES:

The total number of workers commuting between counties of residence and counties of work for 2000 is equal to the sum of the number of commuters by major industry for each separate county of residence/county of work combination. Because of this reason, the number of commuters between place-of-work and place-of-residence counties for the year 2000 in this file will differ from the number of commuters in the Census 2000 file.
