Note: The employment estimates used to compute the average wage are a job, not person, count. People holding more than one job are counted in the employment estimates for each job they hold. All state and local area dollar estimates are in current dollars (not adjusted for inflation).

New estimates for 2008 and revisions for 1969-2007 for wage and salary disbursements and wage and salary employment (CA34), and for compensation by industry (CA06N), were released December 21, 2009.

Note: The employment estimates used to compute the average wage are a job, not person, count. People holding more than one job are counted in the employment estimates for each job they hold. All state and local area dollar estimates are in current dollars (not adjusted for inflation).

New estimates for 2008 and revisions for 1969-2007 for wage and salary disbursements and wage and salary employment (CA34), and for compensation by industry (CA06N), were released

Note: The employment estimates used to compute the average wage are a job, not person, count. People holding more than one job are counted in the employment estimates for each job they hold. All state and local area dollar estimates are in current dollars (not adjusted for inflation).

New estimates for 2008 and revisions for 1969-2007 for wage and salary disbursements and wage and salary employment (CA34), and for compensation by industry (CA06N), were released

Note: The employment estimates used to compute the average wage are a job, not person, count. People holding more than one job are counted in the employment estimates for each job they hold. All state and local area dollar estimates are in current dollars (not adjusted for inflation).

New estimates for 2008 and revisions for 1969-2007 for wage and salary disbursements and wage and salary employment (CA34), and for compensation by industry (CA06N),
