Note: Nonemployers are businesses with no paid employees. Includes only firms subject to federal income tax.

For county- and MSA-level data, the number of establishments and receipts in a data cell are published only if it contains ten or more nonemployer businesses. According to Census Bureau disclosure rules, when a small number of nonemployer businesses have a dominant share of receipts in a data cell, establishments and receipts are suppressed to protect the dominant businesses. These suppressions are assigned a flag of "D." If more than 40 percent of either receipts or establishments in a published row are imputed, we suppress both items because the data do not meet publication standards. These suppressions are assigned a flag of "S." The "D" and "S" flags indicate that there are establishments engaged in economic activity for that industry level, but that the number of establishments and receipts cannot be shown. Data cells that fail both conditions are assigned a flag of "D."

Note: Nonemployers are businesses with no paid employees. Includes only firms subject to federal income tax.

For county- and MSA-level data, we publish the number of establishments and receipts in a data cell only if it contains ten or more nonemployer businesses. According to Census Bureau disclosure rules, when a small number of nonemployer businesses have a dominant share of receipts in a data cell, establishments and receipts are suppressed to protect the dominant businesses. These suppressions are assigned a flag of "D."

If more than 40 percent of either receipts or establishments in a published row are imputed, we suppress both items because the data do not meet publication standards. These suppressions are assigned a flag of "S." The "D" and "S" flags indicate that there are establishments engaged in economic activity for that industry level, but that
