Health Profile

As the number of total births in Marshall County dropped from 1999 to 2003, the number of births to teens decreased by 11. In 1999, births to teens accounted for 14.7 percent of total births in the county compared to 12.8 percent in 2003.

Teen parenting is used as a predictor of future economic hardship for both parents and children. Teen parents are often less able to provide positive, safe and caring environments, or family stability.

In Marshall County, 6.5 percent of total births in 2003 were low birthweight compared to 6.6 percent statewide.

Low birthweight (less than 5.5 pounds or 2,500 grams) can be an indicator of mothers not receiving adequate prenatal care and is often a good predictor of future health and developmental complications.

Early and ongoing prenatal care increases the chances of delivering healthy, full-term, and normal weight babies. Rates are per 1,000 live births.

For the period from 1998 to 2001, the rate of mothers in Marshall County receiving prenatal care during the first trimester of their pregnancy was 825.3 compared to 869.8 statewide.

2. Births to Teens, Low Birthweight Births, Pre-natal Care, and Immunizations

Year	Marshall County		State		Marshall County		State		Marshall County		State	
	n	% of total births	n	% of total births	(per 1,000 live births)	rate (per 1,000 live births)	% fully immunized	% fully immunized	% fully immunized	rate (per 1,000 live births)	% fully immunized	% fully immunized
1999	84	14.7	36	6.3	---	---	83.0	84.0	83.0	---	83.0	84.0
2000	83	14.9	32	5.8	---	---	78.0	86.0	78.0	---	78.0	86.0

Source: Iowa Department of Public Health

*NOTE: Immunization data reflect only one site per county so should be interpreted with caution.

In Marshall County in 2003, 93 percent of children 24 months of age were reported to be fully immunized compared to 83 percent in 1999. Percentages for the state were 89 in 2003 and 84 in 1999.

Fully immunized = 4 DTP/DTaP, 3 Polio, 1 MMR, 3 Hib, 3 Hep. B by 24 months of age.

Infant mortality is considered one of the best overall measures of health care accessibility and quality in that it measures the health of the most vulnerable in a given population. The infant mortality rate is the number of infants who die before their first birthday per 1,000 live births.

In Marshall County, the infant mortality rate from 2001 to 2003 was 5.4, lower than the county rate of 1995-1998 and lower than the statewide rate of 5.5 in 2001-2003 period.

NOTE: Due to the relatively low number of births, infant deaths, and child deaths per year in many of Iowa's counties, users are encouraged to use 3-5 year averages for comparative purposes. These are presented in Tables 3 and 4.

3. Infant Mortality

Year	Marshall County		State	
	n	rate	n	rate
1995-1997	14	9.1	7.1	7.1
1998-2000	7	4.3	6.2	6.2
2001-2003	9	5.4	5.5	5.5

Source: Iowa Department of Public Health

From 2000 to 2002, the child death rate in Marshall County was 0.4 compared to the state's rate of 0.2

Child deaths include deaths to all children ages 1 to 14. Child death rates are the number of deaths in this population per 1,000 total population age 1 to 14.

4. Child Death Rates

Year	Marshall County		State	
	n	rate	n	rate
2000-2002	8	0.4	0.2	0.2

Education Profile

In Marshall County, 53 children were enrolled in Pre-Kindergarten during the 2003-04 school year. This was a 11 child decrease from 2000-01.

Pre-Kindergarten students often demonstrate stronger early reading and math skills than non PK students.

5. Pre-Kindergarten Enrollment

	Marshall County	State
2000-2001	64	5,797
2001-2002	61	5,714
2002-2003	72	5,949
2003-2004	53	6,907

Source: Iowa Department of Education

The Marshall County Empowerment Area reported at least 29.9 percent of its kindergartners consistently displaying school-ready behaviors in the five areas. Statewide at least 35.9 percent of kindergarten students were reported as school ready.

"School readiness" is the result of kindergarten teachers being asked to assess their students in 5 areas: communication skills, cognitive skills, self-management skills, motor skills, and social-emotional development. Teachers report the degree to which behaviors within these five areas are observable ranging from "rarely" to "consistently".

6. School Readiness*, 2002-2003

	Empowerment Area	State
Motor Skills ¹	29.9	48.8
Communication Skills ²	32.3	35.9
Cognitive Skills ³	35.4	44.5
Social/Emotional Dev. ⁴	32.9	50.1
Self-Management Skills ⁵	38.6	43.0

* Percent reported "consistently observed"

Source: Iowa Department of Education

- ¹ Include coordination and balance, using scissors, etc.
- ² Include the ability to ask and answer questions, communicate needs, etc.
- ³ Include using a variety of words to describe a shape or color, ability to sort objects into categories, etc.
- ⁴ Includes ability to build relationships with adults and peers, express emotions and feelings, etc.
- ⁵ Includes ability to follow classroom rules and routines, take responsibility for personal belongings, etc.

Economic Profile

During the 2003-04 school year, 42.7 percent of K-12 students in Marshall County were eligible for free or reduced-price school compared to 36.0 percent in 2000-01. Statewide a total of 144,000 students (30.0%) were eligible for free or reduced price meals.

Because eligibility for free and reduced-price school meals is an annual measure, it is a good indicator of the economic well-being of children in a community. Families with incomes 135% or less of the federal poverty threshold are eligible for free meals, those with incomes 136% to 180% of poverty are eligible for reduced-price meals.

7. Eligibility for Free or Reduced-Price School Meals

	Number Eligible for Free Meals		Number Eligible for Reduced-Price Meals		Percentage Eligible for Free or Reduced Price Meals	
	Marshall County	State	Marshall County	State	Marshall County	State
2000-01	1,707	93,823	687	37,754	36.0	26.7
2001-02	1,855	93,062	572	36,492	36.5	26.7
2002-03	1,957	100,544	546	36,870	37.9	28.5
2003-04	2,236	107,324	593	36,907	42.7	30.0

Family Living Profile

While the majority of the 9,098 children under 18 years of age in Marshall County in 2000 resided in a two-parent family, 24.3 percent lived in a family headed by a single parent.

Children by Family Type, 2000

Source: Census 2000, SF1, US Bureau of the Census

In Marshall County, 71.0 percent of children under 6 living in a family or subfamily had all parents in the labor force compared to 71.4 percent statewide. All parents includes both parents in a married-couple family and the parent in a male- or female-headed family.

8. Employment Status of Parents with Young Children, 2000

	Marshall County		State
	n	%	%
Total Own Children in Families			
Under 6 years:	2,827		
Living with 2 parents	2,032		
Both parents in labor force	1,398	68.8	69.2
Living with father only	172		
Father in labor force	161	93.6	88.8
Living with mother only	623		
Mother in labor force	447	71.7	71.4

Source: Census 2000, SF3, US Bureau of the Census

Safety Profile

The number of confirmed cases of child abuse or neglect in Marshall County in 2003 was 261, an increase of 145 since 1999.

9. Confirmed Cases of Child Abuse and Neglect

	Marshall County	State
1999	116	9,588
2000	162	10,821
2001	237	12,793
2002	196	12,292
2003	261	14,936

Source: Iowa Department of Human Services

In 2003, Marshall County reported 2,760 Group A and 3,030 Group B arrests per 100,000 juveniles compared to rates of 2,003 and 1,180, respectively, for the state.

Source and further details available @ http://www.dps.state.ia.us/documents_repository/DPS/2003/iacrim_e/iacrim.htm

Juvenile arrests are reported in 2 groups, Group A offenses include such crimes as murder, rape, burglary and drug violations while Group B offenses include curfew, drunkenness and runaways.
