Wyoming	20	52,664	1,877	18	65,532	2,400	19	26,778	755

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Median Household Income, Median Family Income and Per Capita Income for the U.S. and all States: 2007

Area	Income in the past 12 months (in 2007 inflation-adjusted dollars)								
	Median household income			Median family income			Per capita income		
	Rank	Median	Margin of error	Rank	Median	Margin of error	Rank	Median	Margin of error
United States		50,740	+/-75		61,173	+/-101		26,688	+/-47
Washington	11	55,591	+/-501	14	66,642	+/-655	11	29,027	+/-243
West Virginia	50	37,060	+/-760	50	46,338	+/-1,076	50	20,419	+/-360
Wisconsin	21	50,578	+/-364	20	62,804	+/-499	23	25,993	+/-195
Wyoming	20	51,731	+/-1,322	18	63,947	+/-2,594	19	27,687	+/-1,131

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.
